### Key Service Centre Features

- Dedicated welding area
- Full service machine shop
- Horizontal lathe
- Machine shop
- Medium sized horizontal mill
- Rotor balancing machines
- Small vertical mill
- Strip + inspection
- Surface scanning/crack test

## Baton Rouge Service Center

Our vast knowledge of the South Eastern United States markets is centered around a deep-rooted history of developing and manufacturing solutions in our Southeast Service Center. Located in Baton Rouge, Louisiana. The SPX FLOW Southeast Service Center services the refineries, pipelines and rigs operating in the Gulf of Mexico with complete rotating equipment repair, testing, and service. We are also an integral facility within SPX FLOW's global service center network.

The SPX FLOW central ethos places the customer at the heart of our operation. This ensures that customers are provided with world-class engineered solutions to meet their operational requirements. We are also fully committed to supporting our customers and their equipment throughout its operational life—supplying OEM spare parts and providing site technical services, training, and workshops on or nearby our customers' premises. Our history and breadth of experience, as well as our geographical coverage and expertise, make us the natural first choice for any engineering-related enquiry, no matter the location, the scale of the task, or the original manufacturer.

## FEATURE

Full service machine shop,  
Dedicated welding area,  
Centrifugal and Positive  
Displacement pump overhauls,  
upgrades and rerates.

## CASE STUDY

### ISSUE

Critical customer pump needing major overhaul during ten day outage

### CONCERN

Unit could not restart if this pump was not installed and operational

### DECISION

SPX FLOW Southeast Service Center to complete major overhaul during outage

### ACTIVITY

Insure all necessary parts and materials were at the service center prior to unit outage

### MOBILIZATION

Service technicians, machinist and engineering staff assigned and briefed on schedule

### COMPLETION

Internally geared, triplex positive displacement pump overhauled in seven days

### BENEFIT TO CUSTOMER

Pump restored to OEM standards and back in service within scheduled outage

## CORE COMPETENCIES

With tailored engineering solutions that enhance equipment reliability and performance, our Baton Rouge Service Center offers numerous core competencies. To progress with changing process requirements, we update existing pumps to the latest API 610 and 674 standards and perform equipment evaluations, upgrades, retrofits, and re-rates. We repair and refurbish all rotating equipment, regardless of the original equipment manufacturer (OEM), and include an OEM guarantee and warranty for all service work.
